

****NOTICE OF ACQUISITION****

Dear Customer,

As of July the 16th 2009 **Elington Pte**, part of **Epsilon Telecommunications Group of companies**, has completed the acquisition of **IP-Converge Pte** in Singapore. IP-Converge Pte will, with immediate effect, trade under the name Epsilon Telecommunications (SP) Pte. Ltd. The acquired infrastructure and licenses will serve Epsilon's co-location and network expansion under its 'Global Hubs' and 'Connect' brands.

The Singapore Facility is located at New Tech Park in Lorong Chuan, and has a total size of 20,000 sq ft of which 10,000 sq ft is used for co-location space. The remaining 10,000 sq ft are for holding the office, NOC and storage facilities. The Data-Centre has already a 45% occupancy rate and hosts some major regional carriers and their clients.

Four local fibre providers are available in the building and there is significant network connectivity available to all other Data Centres in Singapore. The Global Hubs co-location portfolio in Singapore will be a mirror image of the London site with power availability of up to 4kW / rack.

Epsilon Singapore also holds an SBO (Service Based Operator) license and an Internet Services licence. With these in hand, we plan to establish a Metro Network in Singapore within the next three months to provide SDH and Ethernet connectivity to other main Telehouses such as Equinix and Global Switch. This Metro network will be connected to Epsilon's global infrastructure linked to almost 50 facilities across Asia, Europe and the US.

Our recently established office in Hong Kong and the new facility in Singapore will provide the additional resources to support your business needs even better and on a more global scale. This expansion is a major step in Epsilon's Global growth plans and will be continually developed to provide truly global connectivity and co-location solutions to our valued customers.

We hope that you share our enthusiasm and we look forward to providing you an enhanced level of value and options for your connectivity needs. If you have any questions please do not hesitate to contact our team in our head office in London on Tel: +44 20 7096 9600 or email at info@epsilontel.com

Kind Regards,

Andreas Hipp
